

Upenders

Vale Industries Inc. range of Upenders are designed to move a coil (with or without a carrier) from the vertical to the horizontal (and visa versa) position. This greatly simplifies coil handling during processing, allowing the coil to be moved and positioned easily, and without damage.

Vale Upenders are generally based on a number of basic proven designs, used consistently over the years, and tailored to meet specific customer requirements. The Upender is generally tailored to coil size, weight and other specifications such as carrier profiles, if required.

Vale gives you more: Specifications

- **Coil Diameter: Up to 54"**
- **Coil Weight: Up to 12,000 lb.**
- **Shop air or Hydraulic powered**
- **Heavy Duty construction**
